LIST OF CONTENTS

NUMBER 1

Hu Wang, Maocai Ou and Tsunkuei Wang	1	Post-buckling behaviour of orthotropic rectangular plates
J. Padovan and A. Kwang	7	Hierarchically parallelized constrained nonlinear solvers with automated substructuring
J.-C. Luo and M. B. Friedman	35	Analysis of mode shapes using implicit decomposition
J. Jiang and M. D. Olson	41	Nonlinear dynamic analysis of blast loaded cylindrical shell structures
B. Kralj, G. N. Pande and J. Middleton	53	On the mechanics of frost damage to brick masonry
B. S. K. Sundarasivarao and N. Ganesan	67	Deformation of varying thickness composite cylindrical shell subjected to fluid loading with various end conditions
B. Tripathy and K. P. Rao	75	Curved composite beams—optimum lay-up for buckling by ranking
R. C. Mahapatra and S. P. Dasgupta	83	Elasto-plastic solution of some axially symmetric geomechanic problems by mixed finite elements
B. P. Gautham, G. B. Sarma and N. Ganesan	93	A critical comparison of two methods for solving elastic contact problems with friction
Chin-Jen Chen, Wenchin Liu and Shue-Ming Chern	99	Torsional analysis of shear core structures with openings
Zhao Jinping and Shan Huizu	105	Stress analysis around holes in orthotropic plates by the subregion mixed finite element method
B. H. V. Topping and F. L. Wong	109	Finite element modelling of the sonic method of testing masonry structures
Y. Toi and H.-J. Yang	137	Finite element crush analysis of framed structures
C. J. Brown	151	Elastic buckling of plates subjected to distributed tangential loads
S. K. Kunnath, A. M. Reinhorn and J. F. Abel	157	A computational tool for evaluation of seismic performance of reinforced concrete buildings
	175	Corrigendum
	I	Software Survey Section

NUMBER 2

K. M. Rao and H.-R. Meyer-Piening	177	Vibration analysis of FRP faced sandwich plates using hybrid-stress finite element method
N. S. Goel and V. Prakash	189	Tension icosahedron as a structure for use in terrestrial and outer space environments
S. Syngellakis and I. Younes	197	The transfer matrix method applied to frame–shear wall systems
A. G. Hernried	207	Forced vibration response of a twisted non-uniform rotating blade
I. Senjanović and R. Grubišić	213	Coupled horizontal and torsional vibration of a ship hull with large hatch openings
L. Leff and D. Y. Y. Yun	227	The symbolic finite element analysis system
M.-H. Peng and S. Sridharan	233	An optimization strategy for wide stiffened plates subject to interaction of local and overall buckling
S. Ghosh and S. N. Mukhopadhyay	245	A two-dimensional automatic mesh generator for finite element analysis for random composites
L. Y. Chen, P. D. Lin and L. W. Chen	257	Dynamic stability of thick bimodulus beams
D. H. Robbins and J. N. Reddy	265	Analysis of piezoelectrically actuated beams using a layer-wise displacement theory
J. Napoleão, Fo., A. E. Elwi and D. W. Murray	281	Eigenmode dominance and its application to structures with nonlinear materials
F. M. L. Amirouche and N. H. Shareef	293	Gain in computational efficiency by vectorization in the dynamic simulation of multi-body systems
N. N. Huang and T. R. Tauchert	303	Large deflections of laminated cylindrical and doubly-curved panels under thermal loading
Yi-Ping Tseng and Tzu-Chiang Wu	313	Partial hybrid stress method applied to the higher-order laminated plates theory
A. C. Singhal and D. S. Larson	325	Computer simulation of weapon blast pressures on flexible surfaces
A. D. Jefferson and H. D. Wright	331	Stepped softening functions for concrete fracture in finite element analysis
P. K. Gotsis, A. H. Shabaik and G. H. Sines	345	Elasto-plastic analysis of an aluminum alloy matrix reinforced with silicon carbide fibers packed in a hexagonal array
P. W. Khong, J. Rhodes and K. H. Hoon	355	Addition of new features into the finite strip formulation

F. Naeim 363 Interactive finite element analysis on a pocket calculator

T. Mizusawa 377 Vibration of stepped annular sector plates by the spline element method

L. M. C. Simões 385 Entropy-based least weight design of elastoplastic trusses

L. Chai and **L. R. Dharani** 397 Embedded and surface flaws in unidirectional composites

Technical Notes

N. I. Ioakimidis 403 Application of DERIVE to conformal mapping techniques in plane elasticity problems

N. I. Ioakimidis 407 Construction of the equation of caustics in dynamic plane elasticity problems with the help of REDUCE
